

# Concord Light - Electric Heat Weatherization Program

## Overview

**For Electric Heat Customers Only** – If electricity is your primary source of heat, Concord Light will rebate 40% of eligible measure costs up to a maximum of \$1,000. Eligible measures include: Ceiling, floor, and wall insulation, duct and pipe insulation, HVAC duct sealing, and general air sealing (blower door testing is also included).

## How Our Energy Rebate Program Works

You must have an energy audit of the home prior to any eligible measures being installed. Requests are scheduled and completed on a first-come, first-served basis. Please call 1-888-772-4242 to schedule your energy audit. Homes that have been audited with the past 2 years do not need a new audit. Eligible measures must have a payback of less than 10 years to qualify for a rebate and cannot be combined with any other rebate program. Homeowners and renters are eligible to apply. However, renters must obtain written approval from the owner before work begins.

Once the audit is complete, most will need to contact a contractor to obtain a bid for the work to be done. Concord Light is not able to recommend specific contractors. However, web sites such as [www.servicemagic.com](http://www.servicemagic.com) can be helpful in obtaining multiple bids. Homeowners who are installing weatherization measures themselves should be sure to save all receipts for materials associated with the installation. The value of self labor is not eligible for rebate.

When the work is complete, please call 1-888-772-4242 to schedule a post-installation inspection. If the work is approved, please forward copies of the paid invoices and/or any eligible receipts, along with the application form, to:

Electric Heat Weatherization Program  
Concord Light  
1175 Elms Street, PO Box 1029  
Concord, MA 01 742-1 029

Application forms can be found online [here](#), or can be picked up at our office.

If you have any questions, please call us at 978-318-3151.

*Concord Light is not responsible for any installations. Concord Light reserves the right to inspect the measures in order to verify the above information at any time for up to one year after receiving the rebate application. The rebate will be issued in the form of a credit on the customer's account, unless other arrangements are made and approved by an authorized member of Concord Light.*
